

STRATEGY

The objective of the subfund is to ensure balanced growth of the assets of the subfund by investing at least 85 percent of its net assets in the investment units of Class I of the fund Artea Europe and Baltic Bond Subfund (hereinafter – the Master Fund) of the umbrella investment fund Artea Fund intended for institutional investors established in the Grand Duchy of Luxembourg. This way, the subfund will operate as a feeder subfund. In its turn, the Master Fund invests up to 100 percent of its assets in government and corporate debt securities in Emerging Europe. Recommended investment term – minimum 1 - 2 years.

FUND MANAGER COMMENT

The European bond market experienced a slightly positive month, thus Artea Europe and Baltic Bond subfund returned 0.3%, similar to benchmark's 0.4% return during April.

Tariffs were the primary focus this month. On April 2, 2025—an event that quickly became known as "Liberation Day"—U.S. President unveiled a broad and aggressive tariff strategy. His administration implemented a flat 10% tariff on nearly all imported goods, effective as of April 5. This was followed by a second wave of targeted "reciprocal" tariffs, rolled out on April 9, which imposed significantly higher duties on imports from over 60 countries. This brought significantly increased volatility to US treasury market with yields jumping from 4.0% to 4.5% in a matter of few days. However, some of the initial tariffs were later paused and the start of trade negotiations calmed the markets, with UST 10Y yield ending the month largely unchanged at 4.2%. Continued disinflationary trends and expected economic headwinds from uncertain global trade policy resulted in a sixth consecutive rate cut by European Central Bank. Primary market was relatively muted during April, however, activity started picking up again in the last week of the month.

The Fund exited one position during the month – Polish PKO Bank. Even though the issuer is financially sound, the bond yield contracted to below 3.4% at which point we exited the position, as further upside is very limited. Longer duration Polish names (POLAND 33s and 34s, BGOSK 32s and 35s) were among the best performers as long-term yields contracted during the month. Overall, the fund maintains lower interest rate sensitivity than the benchmark (3.3 and 3.9 duration respectively), while providing higher yield to maturity (4.8 and 4.4 respectively) and weighted average investment grade rating.

*Standard deviation is used to measure risk. Standard deviation is an indicator that measures how strongly fund's daily return deviates from its mean. The lower the standard deviation the lower the fund's risk. The standard deviation value corresponds to the period shown in the historical returns graph.

**Sharpe ratio measures the performance of an investment compared to a risk-free asset, after adjusting for its risk. The greater a portfolio's Sharpe ratio, the better its risk-adjusted performance. Sharpe ratio value corresponds to the period shown in the historical returns graph.

The Fund does not have exposure to Russian and Belarusian bonds

REASONS TO INVEST

- Combination of only hard currency (EUR or USD) sovereign and corporate debt ensures attractive yield, while limited credit and duration risk provides for low volatility.
- Fund maintains average investment grade credit rating. Lower government debt levels – Central and Eastern Europe 52%, Eurozone 88% (as of the end of Q2 2024).
- Active share of over 80% (creating value through off-benchmark picks, participation in primary issues, inefficiencies in the market).
- Historical Sharpe ratio exceeding 1 places the fund among the best Emerging Europe bond funds in the world by risk-adjusted returns.

COMPANY

Artea Asset Management is the investment management company of Artea bankas group. The team of experienced investment managers is one of the largest and most capable in the Baltic States and has been managing clients' assets since 2003.
