

Artea Pan-European and Baltic Bond Subfund

2025 April

Disclaimer

Artea Pan-European and Baltic Bond Subfund (hereinafter – the Subfund) is a subfund of the open-ended harmonized investment fund Artea Umbrella Fund, managed by UAB „Artea Asset Management“ (hereinafter – the Management Company).

The Subfund is the feeder undertaking of the subfund Artea Emerging Europe Bond Fund (hereinafter - the Master Subfund) of the harmonised umbrella undertaking for collective investment in transferable securities (UCITS) Artea Fund, established in the Grand Duchy of Luxembourg, which constantly invests at least 85 percent of its net assets in the investment units of the Master Subfund.

Investing into Subfund's investment units is related to the investment risk. Subfund's past results only show the results of the Subfund's activities for a past period, and the past period results do not constitute a reliable indicator of the future results. Past results do not guarantee future performance. If the return on investments previously was positive, it will not necessarily be so in the future since the value of investments can both rise and fall, the investor could regain less than invested. The Management Company does not guarantee the profitability of investments. The latest values of the Subfund's investment units are published on the website <https://www.artea.lt/en/private/saving-investment/investing/investment-funds/artea-pan-european-and-baltic-bond-subfund>.

Before making a decision to invest, the investor should personally or with the help of investment advisors assess the Subfund's investment strategy, applicable fees and all investment-related risks. The investor should also carefully read the Subfund's Rules, Prospectus, Key Investor Information Document and other documents intended for the investors, which are to be found on the website of the Management Company <https://www.artea.lt/en/private/saving-investment/investing/investment-funds/artea-pan-european-and-baltic-bond-subfund> or may be obtained free of charge at the customer centres of the Management Company.

The Subfund uses a composite benchmark index which is chosen to reflect as precisely as possible the investment strategy (asset types and proportions) specified in the Rules and Prospectus, as well as the strategic distribution of the Subfund's investments.

Highest overall rankings in 3 of 4 categories among Emerging Europe bond funds registered for sale in Germany

*Total expense ratio (TER) is the average share of subfund's net assets used to cover its management costs.

**The conditional TER (Total Expense Ratio) is the ratio where the denominator is the average net assets of the subfund for the relevant period, and the numerator is obtained by summing the subfund's total operating expenses included in the calculation of its TER, as well as all other expenses related to the subfund's investments in other collective investment schemes, and adding the subscription and redemption fees paid to the collective investment scheme in which the investment is made.

**Benchmark index: 50% Bloomberg Pan Euro EM: Europe Total Return Index Unhedged EUR (I04339EU Index); 40% Bloomberg Pan-European High Yield (Euro) TR Index (I02501EU Index); 10% European Central Bank ESTR OIS Index (OISESTR Index). Previous benchmark index (until November 30th 2023): 50% J.P. Morgan Euro Emerging Markets Bond Index (EMBI) Global Diversified Europe (JPEFEUR Index), 40% Bloomberg Pan-European High Yield (Euro) TR Index (I02501EU Index), 10% European Central Bank ESTR OIS Index (OISESTR Index)

Superior characteristics compared to EUR-denominated investment grade corporate debt index

	Ann. return*	Volatility	Sharpe	YTM	Duration
Artea Subfund	3.1%	2.3%	1.3	4.8%	3.3
IG corp. EUR bonds index	2.4%	3.1%	0.8	3.1%	4.6

Since inception, the fund has earned a substantially higher return but with lower volatility, therefore offers a better risk-return profile

Components of fund's return

CEE bond market inefficiencies

High value off-benchmark opportunities

Flexibility to switch between government and corporate bonds

Active participation in primary market

Typical issuers that the fund is looking for: case study

Globalworth:

- Leading office investor and landlord in Central and Eastern Europe, with a portfolio of over 1 million sqm of assets:
 - Value of investment property at over 2.5 billion EUR;
 - Tenants mostly in Poland and Romania.
- Solid fundamentals, strong and stable cash flows, decent debt level – **LTV as of December 2024 was 38.1%, occupancy rate at 86.7%. EPRA net initial yield as of end of 2024 stood at 6.0%.**
- It is not included in the CEE bond benchmark due to lower than USD 500 M bond issue.
- BB-/BBB- rated issue offers a solid YTM of around 6.3%.

Why CEE region and
what are its main
characteristics?

Very evident convergence story

CEE region clearly not as leveraged as many EU and global peers

Source: IMF, 2024 estimate figures

Summary

Asset class

Under-researched region which offers attractive opportunities for active bond selectors.

Team

Experienced team with solid track record in very active management of Emerging Europe bonds and equities.

Strategy

A proven strategy of bottom-up bond picking and exploiting market inefficiencies to generate alpha.

Balanced risk / return

Short duration and hard currency investments that allow to earn sufficient returns with very moderate drawdowns.

Additional information

ESG & sustainability

ESG integration (Article 6 under SFDR*)

“Avoid” approach with focus on downside risks

Two main ESG strategies used across fixed income strategies:

Negative / exclusionary screening

- No involvement / significant income from controversial weapon production and sales, tobacco, alcohol, gambling, pornography sectors.

ESG integration

- Bloomberg ESG score which includes a set of standardized ESG metrics as well as indicators published by third parties are considered in investment decision making.
