FUND MANAGER COMMENT

April saw a strong bounce back in global capital markets. Artea Emerging Markets Ex-Dictatorship Bond subfund gained 1.9% during the month, in line with the benchmark.

All focus remained on the war in Iran and the possible resolution for the conflict, as markets remained volatile. A ceasefire announcement in early April and limited amount of aerial strikes during the month pushed up risk asset prices, including Emerging Market bonds. Despite this, as the oil prices are still high, markets are expecting a rate hike by the European Central Bank in June, while the FED is expected to keep rates unchanged. In Latin America, Brazil's central bank delivered its second consecutive 25 bps interest rate cut, as it argued Brazil is in a good position to absorb the external energy shock due to its hawkish stance through 2025. Brazil is among the best performers YTD in comparison to the largest EM countries. Central Eastern Europe, Hungary experienced a historical political shift – Viktor Orban conceded defeat in parliamentary elections after 16 years in power. Not only did the pro-EU Tisza party win the majority of seats in parliament, it gained two-thirds majority which is needed for constitutional amendments. As a result of this, Hungary's sovereign bonds are among the best performers in Europe year-to-date.

During the month, Artea Emerging Markets Ex-Dictatorship Bond subfund added to one of its top position – Trans-Oil. Later in the month, Trans-Oil announced a partial tender offer for its 2029 bond at a significant premium to the market price and a plan to issue a new 2031 bond. We plan to participate in the tender offer and reinvest proceeds into the new 2031 issue as the investment rationale is still unchanged. Brazilian steel producer CSN was the best performer during the month, with over +15% gain in April, as prospects of solving in short term liquidity problems are progressing. Overall, the fund maintains lower interest rate sensitivity than the benchmark (5.0 and 6.0 duration, respectively) while providing better yield to maturity (6.3% vs 4.5%, respectively).

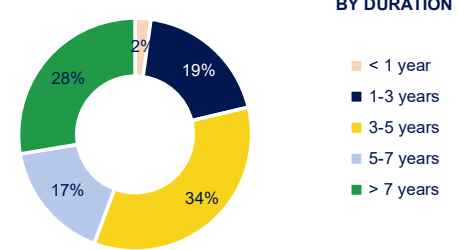

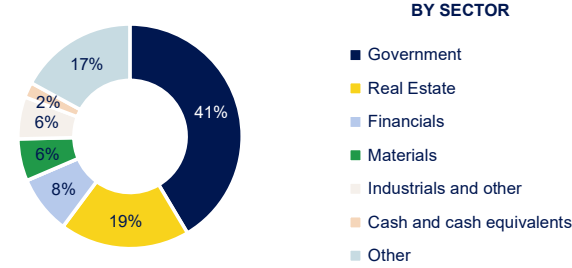

*Data for Artea Emerging Markets Ex-Dictatorship subfund Class K before 2025-12-01.

**Standard deviation is used to measure risk. Standard deviation is an indicator that measures how strongly fund's daily return deviates from its mean. The lower the standard deviation the lower the fund's risk. The standard deviation value corresponds to the period shown in the historical returns graph.

***Sortino ratio is used to measure the risk-adjusted return of the portfolio. It is a modification of the Sharpe ratio but penalizes only those returns falling below required rate of return. Sortino ratio is obtained from Bloomberg which measures the ratio over a 3-year period at a daily granularity. Information displayed for Class K.

REASONS TO INVEST

- Historically, Emerging market economies have been growing almost twice as fast as Developed markets.
- Government debt levels in emerging markets are twice as low as in developed countries.
- High active share investing into up to 25 most attractive investments by identified market mispricings, EUR and USD issues arbitrage and off-benchmark opportunities while avoiding certain issuers.
- Relatively low volatility due to investments in shorter-duration corporate bonds and less indebted as well as better rated government and off-benchmark picks.
- Combination of only hard currency (USD risk hedged to EUR) sovereign and corporate debt ensures attractive yield, while limited credit and duration risk provides for low volatility.
